

Auto Action: Edit [New Member Registration]

Published

Select publish status of auto action. Unpublished auto action will not execute.

Title

Optionally input title to display on action list in replace of Triggers list.

Description

Optionally input description to display on action list on mouseover of Triggers list or Title.

Type (required)

Select type of auto action. Type determines how an action executes.

Triggers (required)

Input comma separated list of triggers or select trigger to append (e.g. onAfterLogin).

User (required)

Select if user object should be automatically obtained from trigger variables, if manually selected variable should be used (e.g. function login(\$var1, \$var2, \$var3) {...}, if user executing the trigger, or if specified user id should be used.

Access (required)

Custom ACL
 Everybody
 All Non-Registered Users
 All Registered Users
 All Non-Moderators
 All Moderators

Select access to auto action; only groups selected will have access. Parent groups such as Public Front-end will NOT fire for Registered users; exact groups must be selected.

Conditional

Optionally input substitution supported conditional from one value to another. If condition is not met then auto action will not be executed. At least one value (left or right side) and an operator must be specified for conditional to be valid. Additional conditionals can be added or remove using the + and - signs. Conditionals can also be re-ordered using drag and drop.

URL (required)

Input substitution supported URL (e.g. index.php?option=com_comprofiler). Optionally specify "return" to send the user back to the page the trigger executed on. Optionally specify "goback" to perform a browser history back. Optionally specify "reload" to perform a browser page refresh.

Redirect Action
Perform page redirects with or without messages.**Message**

Input substitution supported message to be included with redirect followed by selecting message type (e.g. Welcome {username}!). Message type determines display of message; format is template dependant and not guaranteed.

Type (required)

Select message display type. Type will determine the messages formatting.

Exclude

Optionally input comma separated list of user ids to be excluded from auto action (e.g. 62,39,21,8).
